series

ERGONOMIC – series 200/400

MEETING – series 500

MEETING – series 100

EQ, the intelligent choice.

Combining style and ergonomic comfort, the EQ series of chairs has been designed especially for the workplace and modern home.

“We wanted to design a specialised and unique product for our clientele; a range of chairs at the forefront of design and technology. Innovative construction techniques and intuitive engineering have allowed us to create a chair that feels as good as it looks, promoting healthy sitting at all times.”

The new EQ, is a fusion of clean, modern design and ergonomic excellence. Designed in such a way as to allow ‘free movement’ while seated, thereby stimulating circulation and encouraging movement of the joints. This means you can enjoy more ease and comfort while working.

From a design perspective the EQ series of chairs have an informally symmetrical aesthetic. Each visual element is ideally proportioned to create a chair that looks as good as it feels. The impression is confirmed upon sitting. Rather than bulky and thickly padded, the seat, backrest and armrests are slim, well shaped elements that are both aesthetically pleasing and comfortable. Due to the dimensions and range of adjustment, the EQ chair will comfortably accommodate 90% of working age people, (as defined in internationally respected anthropometric references).

All this adds up to a more comfortable day, which translates to a happier day and greater productivity.

Unique to the EQ series, is the ability for our customers to fashion their own chair. Available in fabric or leather, in a range of colours, with the choice also to finish the arms and base to match, the EQ can be personalised to suit the office or home.

The EQ is designed and manufactured in Wellington by ergoform Limited, a company with a strong vision and a passion for good design.

EQ-meeting

{series 100}

- Seat Height Adjustable & Swivel Only
- Removable Arm Rests
